

## Area: Bathroom

### I Am Safe

*I take care of myself and those around me.*

### Teaching Examples

Example: Karen used the restroom and washed her hands afterward. Before leaving the restroom, she wiped up the water around the sink and threw her paper towel in the garbage.

Non Example: Chris used the bathroom and splashed water all over while washing his hands. The next person who came into the bathroom slipped on the wet floor and got injured.

### Activity and/or Refresher to do later

1. Do glitter activity to demonstrate how quickly germs spread. Have one student get their hands wet and then put glitter on them. Have the student go shake hands with a friend, and then that friend shake hands with another, and so on. Show the importance of washing hands in order to prevent the spread of germs.
